

Business protection with axonBackup24/7

In the age of technological dependency, data is critical to business success. Emails, files, invoices, financial data, customer records, databases and documents all make up vital company information that most of us cannot function without.

Fire, flood, theft and hardware failure can destroy years of hard work in seconds, making an off-site backup solution a crucial step to protecting your business.

Downtime costs money, so getting back up and running in the event of an emergency can be the difference between success and failure, which is where axon can help.

axonBackup24/7 provides a fully managed automated online backup solution to ensure your data is kept safely off-site and can be quickly restored in the event of a loss.

Stored in our Manchester-based data centre, axonBackup24/7 offers a flexible and secure approach to protecting your data, and can be fully tailored to meet your business requirements.

Features of axonBackup24/7 include;

- A wide range of scheduling options including multiple full backups
- Functionality across Windows, Linux, Mac and FreeBSD
- Intuitive user-friendly interface
- Easy end user restore capability
- Up to 448-bit encryption using the military strength Blowfish algorithm
- Automatic directory monitoring
- Detailed graphical reporting

According to the Contingency Planning Research and Strategic Research Corporation, 43% of companies experiencing disasters never re-open, and 29% close within two years – is this a risk you are really prepared to take?

For peace of mind that your business is protected, why not contact axon today for your free 30 day trial of axonBackup24/7.

The question is not whether you'll lose data.....It's how prepared are you for when you do?
